

2015 LG TV/AV COLLECTION

One of a Kind TV for a Better Life

We did not invent the first television, but our innovation has created the first one of a kind. Witness the finest details of your favorite contents in the most original colors and sounds, as if you are actually there at that very moment.

Our TVs have come a long way, and we refuse to cease our momentum of innovation. We strive to make your already good TV Life even Better. And we will.

Perfect Black, Perfect Color

When the self-lighting OLED pixel turns itself off, your viewing experience will never be the same, but perfect.
As perfect color prevails in perfect black, you will know right away.
How breathtaking it is to witness perfection.

Each life tells a different story.
Each OLED pixel shines on its own to animate these precious stories.

Innovative Technology

OLED TV is here now. Gone are the backlights, shutters and other complex structures of LCD. LG OLED TV redefines television and recreates reality with perfection. Meet the TV of your dreams.

Self - lighting Pixel

OLED pixels are self-lighting, meaning they can switch on and off individually. This allows for a beautiful contrast range of the brightest whites and the darkest blacks for a picture of unbelievable depth.

4K Resolution

ULTRA HD resolution is four times that of Full HD for brilliant clarity and deep details that amaze, even when viewed up close.

33 Mega Color Pixels

LG's 33 Mega Color Pixels deliver an immersive 4K OLED picture for the perfect viewing experience. 4 Color Pixel Technology makes White, Red, Green and Blue possible in every pixel for the ultimate picture quality.

(Disclaimer : 33 Mega Color Pixels = 8.3 million pixels(4K) x 4 color pixels Color Pixels mean sub-pixels that consist of each pixel.)

Picture Quality

Only the brilliance of OLED can recreate every shade and hue imaginable. Bright pictures will pop with more vibrancy and the darkest scenes will reach new depths.

Perfect Black

Self-lighting Pixels offer the perfect expression of black for dark scenes that come alive with greater visibility and vivid detail.

Perfect Color

Self-lighting Pixels maximize your viewing experience with colors true-to-life. Whatever you watch will be so real that you will feel like you are right there.

Perfect Curve

Stay ahead of the curve and be immersed in the action like never before possible. Consistent color and clarity from every angle is delivered only by LG's Curved OLED TV.

Perfect Viewing Angle

Immersive viewing comes from every angle for natural color and consistent picture quality. Now you can enjoy perfect color from any seat.

Clear Motion

The unbelievably fast response speed delivers blur-free and crystal-clear clarity even during the fastest sports and movie scenes.

Art Screen

The sleek and slimmed down 4-sided frame removes everything but the essentials. The minimalist design provides seamless viewing for a new level of immersion.

Art Slim

OLED TV's Art Slim design gives its technological innovation a touch of elegance. LG OLED TV blends the best of both picture excellence and slim design technology.

Design

Only LG OLED can take state-of-the-art technology and make it look like a piece of art. Experience a display that's beautiful when it's off and breathtaking when it's on.

Sound

The sounds of LG OLED TV are just as impressive as its breathtaking pictures. With the full impact of sound, your viewing experience becomes more vibrant and enriched than ever.

Sound Designed by harman/kardon®

Breathtaking pictures deserve premium sound. Highly refined sound by harman/kardon® will give your ears a premium listening experience.

ULTRA Surround

Complete your viewing experience with immersive sound. The multi-channel sound effect will surround you from top to bottom, left and right, front and center.

LG

Every Color Comes Alive

As LG ULTRA HD TV brings every color to life, each scene becomes a sight to behold, a wonder you don't ever want to miss. The supreme picture quality and topnotch resolution will portray every scene so vivid and real that you won't actually have to be there. On this note, turn on LG ULTRA HD TV to revisit that beautiful mountaintop you once took a trip to.

LG ULTRA HDTV

Picture Quality

On LG ULTRA HD TV, every color comes alive, and each detail prevails. The ultimate viewing pleasure is all yours.

ColorPrime

Take in the full color range with LG's Nano Spectrum Technology for a viewing experience filled with hues and shades you never knew existed. Now, see the world with greater realism and depth as hidden beauty comes alive.

ULTRA Luminance

Subtle difference in brightness now can be delivered by extended expression range of brightness with higher peaks and enhanced contrast ratio. Finally, experience more vivid and realistic images from ULTRA Luminance.

Picture Quality

4K resolution is truly impressive; true-to-life colors fill up the screen. Watch from any angle. Watch from both far and up-close & personal distance. The vivid wonder stays the same.

IPS 4K

One of the secrets behind LG TVs' outstanding high-definition performance is the specially designed display panel. IPS 4K delivers true colors from any angle with 4 times the resolution of Full HD. With IPS 4K, make any seat the best in the house.

True Color Accuracy

IPS 4K delivers the most identical color impression to that of the original image in every pixel of 4K resolution. See color as natural as the original for incredibly rich colors all across the screen.

Wide Viewing Angle

The IPS 4K Panel maintains color vibrancy all across the screen and from wide angles. This allows you to enjoy lively and vibrant color from every seat in your house.

Stable Screen

IPS panels are stable and sturdy, and resistant to damage, as opposed to weak competing panels; just try a simple knock or poke at the screens to see for yourself.

4K Upscaler

You can now enjoy 4K in more ways than ever. The 4K Upscaler enhances the details of broadcasts, movies and sports to near 4K quality, giving you picture perfection in new and exciting ways.

Design

By perfectly balancing its premium design with world-class resolution, LG ULTRA HD TV enriches any décor. The breathtakingly slim design naturally blends into your living space for a look of class and taste. LG ULTRA HD TV, beautifully stunning on or off.

ULTRA Slim

You can now enjoy a bigger 4K screen in a slimmer size. Finally, stunning 4K picture is packed in slim to seamlessly blend in with your home's décor.

CINEMA SCREEN

Enjoy the immersive viewing experience through CINEMA SCREEN. With minimized bezel, CINEMA SCREEN design brings the cinematic viewing experience to your home.

Auditorium Stand

The design that stands alone, the unique stand design reflects sound to create an immersive sound experience just like in an auditorium.

Sound

The sounds of LG ULTRA HD TV are just as impressive as its visual power. With the full impact of sound, your 4K viewing experience becomes more vibrant and enriched than ever.

Multi-Channel Speaker System

With a built-in Multi-Channel Speaker System, you'll now enjoy truly powerful room-filling sound for a more immersive entertainment experience.

Sound Designed by harman/kardon®

harman/kardon® brings a new level of premium sound for the listening experience that's just as immersive as the viewing.

ULTRA Surround

ULTRA Surround delivers high quality listening that seems to surround you from every direction in rich sound. Now, maximize your 4K viewing experience.

webOS 2.0

LG webOS TV is designed to be obviously simple, so that it is easier to learn and more fun to use. Now, all you have to do is relax as webOS 2.0 makes the TV experience simpler than before.

Simple Switching

Switch back and forth between apps and content with the perfectly simple interface. Accessible at any time, the Launcher and Live Menu make it fast and easy to switch over from one content to another.

Simple Discovery

Find and enjoy what you want to watch instantly at one place. Live TV broadcasts, VOD services, 3D content and apps – they're all incredibly easy to find. You can also receive recommendations that introduce you to even more great content on LG webOS TV.

Simple Connection

Find your way with ease as LG webOS guides your every move with simple and fun instructions from start to finish.

3D

Experience a new dimension in immersive content with 4K 3D lifelike detail that will surprise your eyes.

4K3D+

The world's most comfortable 3D is also the sharpest 3D in 4K resolution. With its quadrupled resolution, the 3D images are more splendid than ever and the realism more lively than ever.

Flicker-free 4K 3D

Enjoy 3D movies on a large screen at home, just like the movies. The larger the screen, the more important it is for your 3D to be flicker-free. Even the large screen of LG ULTRA HD TV provides flicker-free, comfortable images that make the 3D entertainment more enjoyable.

4K 3D Upscaler

Even 3D movies of low resolution can be upgraded to be played on LG ULTRA HD TV. By automatically upscaling 3D movies close to 4K quality, it lets you enjoy 3D on a whole new level.

Bright 4K 3D

LG ULTRA HD TV delivers bright and beautiful pictures, even in 3D. The reality from 4K 3D gets more alive.

Comfortable 3D Glasses

Enjoy 3D wearing the most comfortable 3D glasses. LG's 3D glasses are light, battery-free, hassle-free and economical, allowing for greater viewing comfort and convenience.

Additional

HEVC

The HEVC is the format that will be the future standard for 4K video compression. Now you can enjoy 4K quality content via Internet streaming or USB without requiring support from any extra device.

4K 60P HEVC

HEVC supports 4K video with 60 frames per second delivering clear and blur-free motions. Now you can enjoy 4K quality content via Internet streaming or USB without requiring support from any extra device.

HDMI (4K 60P)

HDMI can transmit large amounts of data at once. This advanced technology even supports 4K video with 60 frames per second which is the expected standard for 4K broadcasting.

Make TV Simple Again

For a family TV session to go right, simplicity comes first. Indeed, this simplicity has marked the birth of LG webOS TV. Let your watching experience be more fun and easier than ever. We have made TV simple again.

LG webOS TV
Smart+

Simple Switching

Switch back and forth between content and programs, apps and shows with the perfectly simple interface. Accessible at any time, the Launcher and Live Menu make it fast and easy to switch over from one content to another.

webOS 2.0

Launcher

You can switch to any app, broadcast, VOD service or connected peripheral without navigating to a dedicated 'home' screen. Instantly find your entertainment right on your Launcher.

Recent

Home

My Apps

My Channels

Recent

The left side of your Launcher shows recently watched content. Through Recent, easily access to the contents you were enjoying previously and resume the content right where you left off.

Home

Regardless of what you are doing, pressing the home button on the remote will show you the main part of the Launcher where you can easily access premium contents and My Channel.

My Apps

On the right side of your Launcher, all the installed apps are listed. You can change their order to fit your needs with a simple drag & drop like on your computer.

My Channels

You can save your favorite Live TV Channels or have a Set-top Box Channels on the launcher for easy anytime access.

Live Menu

Keep your entertainment flowing while surfing through live TV, recorded programs, VOD and movies. Being entertained just got a whole lot more efficient.

Magic Remote (Applied to NetCast model, too)

Take control of your entertainment with a new level of remote control convenience. Controlling your TV is now as easy as using a computer mouse. Now, spend less time searching and more time enjoying.

Home
Press home button to simply bring up the Launcher to see all the apps and services you have used or downloaded.

Point
Simply move your Magic Remote cursor over content and play it with a simple click or even drag & drop.

Scroll
Scroll up and down, zoom in and out using the scroll wheel. You can change between web pages and channels by simply sliding your fingers over the scroll wheel - just like a computer mouse.

Universal Control
Control and access your set-top box, speakers, BDP, and even satellite TV with a single remote, a one-stop solution for maximum convenience.

Voice
Speak to your Remote to find what you want. The TV can understand your words and respond as you wish, creating a more intuitive way to interact with your entertainment.

Today

Always have access to today's hottest entertainment options with recommendation. VOD contents will be delivered right to you.

LG Content Store

Your search for new and exciting content is over. Find everything you love about entertainment in LG Content Store, the one-stop-shop for TV programs, VOD, 3D content, apps and more.

Simple Discovery

Find and enjoy what you want to watch instantly at one place. Live TV broadcasts, VOD services, 3D content and apps – they're all incredibly easy to find. You can also receive recommendations that introduce you to even more great content on LG webOS TV.

webOS 2.0

Simple Connection

LG webOS TV was designed to assist you in every aspect of your viewing experience even from the initial setup to connecting external devices. Now simply get connected to your new Smart TV!

webOS 2.0

Fun Setup

Let the fun and lovable BeanBird guide you through your setup process. BeanBird delivers stress-free personal assistance that's easy and fun. And simply adjust your settings through Quick Setting anytime.

Input Assist

Plug and play on with a helpful pop-up screen that instantly appears when you connect a new device. External devices can also be accessible through the Input Picker found on the right top of Home screen.

SmartShare

Instantly access and comfortably navigate your favorite content with SmartShare's all-in-one entertainment hub. Find loads of new ways to share content stored on your smart devices up on the big screen for friends and family to enjoy.

Picture Quality

IPS

You can now experience vivid colors at wide viewing angles with LG's world-class IPS display that makes every seat the best seat.

True Color Accuracy

IPS delivers the most identical color impression to that of the original image. See color as natural as the original for incredibly rich colors all across the screen.

Wide Viewing Angle

IPS maintains color vibrancy all across the screen and from wide angles. This allows you to enjoy lively and vibrant color from every seat in your house.

Stable Screen

IPS panels are stable and sturdy, and resistant to damage, as opposed to weak competing panels; just try a simple knock or poke at the screens to see for yourself.

True Black Control

LG's local dimming technology enhances contrast with darker blacks. With more pronounced blacks you'll enjoy a picture with sharper detail and clarity.

Natural Color

By minimizing color reproduction errors, original image can be conveyed on display.

LED Plus

Besides the usual benefits of crystal-clear images and vivid, deep colors, LED Plus delivers truly realistic colors and contrast with Spot Control technology.

Contrast Optimizer

In addition to localized dimming of backlights, Contrast Optimizer maximizes contrast and brightness by enhancing contrast and details of local areas.

Picture Wizard III

Picture Wizard III allows you to easily adjust picture elements such as black level, color, tint, sharpness and backlight levels.

Smart Picture Mode

Smart Picture Mode lets you enjoy every scene in the best possible mode, adjusting the brightness, color, and other factors to suit the kind of content you are watching.

Design

CINEMA SCREEN

CINEMA SCREEN is a TV design that brings the cinematic viewing experience to your home. Enjoy the immersive viewing experience through minimized bezel.

Dual Metal

Dual Metal is designed to give a modern look to your interior with metallic frame on the top and bottom of the TV.

Metallic Design

Enrich your living space with a modern metallic design that seamlessly blends in with your home's décor.

Sound

Smart Sound Mode

Whether it be music, movies, sports, or games, you no longer have to choose a sound mode as the Smart Sound Mode will do it for you, allowing you to enjoy the best sound for your entertainment.

Clear Voice II

Clear Voice II automatically recognizes and enhances the volume of human voices in movies and shows to make them more audible against background sound.

Virtual Surround Plus

Put yourself in the middle of the action with Virtual Surround Plus that delivers an extended sound field as well as extreme voice clarity.

Virtual Surround

Put yourself in the middle of the action with Virtual Surround that delivers an extended sound field.

Wireless Sound Sync

Simply connect your speaker systems to the TV wirelessly and enjoy its rich sounds.
*Disclaimer: Your speaker systems should have Bluetooth™ to use this feature. (LG Multi Room Speakers are compatible using Wi-Fi.)

Sound Sync

Connect LG speaker systems to the TV and enjoy its rich sounds via optical cable. This simple link between LG devices delivers incredible depth and liveliness to your ears.

CINEMA 3D

Immerse yourself into CINEMA 3D that delivers thrills while remaining comfortable on the eyes with flicker-free 3D technology. The lightweight and battery-free glasses will maximize your pleasure even further.

Comfortable 3D Glasses

CINEMA 3D glasses are light, flicker-free, battery-free, hassle-free and economical, allowing for greater viewing comfort and convenience.

Dual Play

LG TVs with Dual Play function transmit two separate 2D images that can be seen through two different sets of glasses. So when two players wear the glasses while playing games, each will see a different image covering the entire screen.

3D Sound Zooming

The complete 3D TV is here with 3D sound that is fully synced with the 3D images on-screen. 3D Sound Zooming makes your 3D experience even more immersive than ever.

3D Depth Control

Control the 3D that you are watching to suit you best. With 3D Depth Control, the apparent depth of on-screen images can be adjusted to suit the viewer.

Eco

Smart Energy Saving

The feature includes backlight control for adjusting brightness, a screen-off function that turns the picture off for playing audio-only, and the Standby Mode Zero function which allows the TV to effectively hibernate, using zero electricity.

Motion Eco Sensor

The Motion Eco Sensor is a brilliant new technology that reduces power consumption by slightly adjusting the brightness of the screen relevant to the speed of the pictures.

Additional

Screen Share

Display contents from your mobile devices up on the big screen by simply mirroring your LG TV with your smart devices using MHL, WiDi and Miracast. You can now share hassle-free and boundary-free.

Content Share

Freely share and access a variety of contents on different devices. Now easily share contents between mobile devices and your LG Smart TV via Wi-Fi or DLNA.

LG Cloud

With the LG Cloud service you can play your content on your Smart TV from anywhere, anytime. Quickly access videos, music, and photos from other devices, then enjoy them on your TV.

Wi-Fi Built-in

Just like a smartphone, LG Smart TV now has a Wi-Fi chip built in the system, allowing greater connectivity and access to and from the TV.

HDMI

HDMI is essential for enjoying good quality of contents through external devices. HDMI can transmit large amounts of video and audio data without losing qualities.

USB Movie

Simply connect your USB or external hard drive to the USB port to play its contents on your TV screen.

Smart Mobile Link

Make any TV a Smart TV with LG's Smart Mobile Link. Now, no matter what kind of TV you have, you can enjoy the Smart TV experience.

DivX HD

LG TVs are DivX Certified®, and can play DivX® video up to 1080p HD. Enjoy the vast variety of premium content from the internet through DivX HD.

SIMPLINK

SIMPLINK allows to control of LG Blu-ray Disc Player, LG Home Theater System and other LG devices with just one Remote.
